"Red Head" TW-100 SERIES TOTE WASHER

Simplicity in Application - Efficiency in Washing

The *"Red Head"* TW-100 Tote Washer cleans tote tanks with a standard 22" manway or 6" screen-top openings with optional attachments. The TW-100 Tote Washers with a high volume, high pressure spray. The spray-wash pattern insures all interior vessel surfaces are washed even corners and under the top. Operations managed by an Allen Bradley PLC and a two line display operator interface. The PLC insures that washing only takes place when all safety devices are satisfied. The operator moves the vessel to the washer, lowers the gasket into position and pushes the "Start" button.

The washers consists of a high-pressure wash pump with a three way valve for rinse supply and a wash solution take-away pump. The wash solution is recirculated to minimize the use of clean-wash solution. When the wash cycle is complete, the clean rinse solution is activated volume required is typically < 3 gallons. Typical wash cycle times are 3-5 minutes per tank. The washer nozzle is driven by the wash solution flow. The nozzle is geared to prevent free-wheel spinning. The spray pattern is directed for maximum impact and complete coverage.

Optional 6" Screw-Lid Adapter

*HOIST SUSPENDED WASH LID
Allows easy alignment of wash lid
to tote. Bellows seal insures
"closed" operation*

*ALLEN-BRADLEY MICROPROCESSOR
CONTROLLER
All operating controls, safety interlocks
on one screen.*

FEATURES:

- Eliminates vapor exposure to your employees
- Cleans stores efficiently
- Saves time versus manual cleaning
- Pressure washing cleans "all" interior surfaces
- Wash nozzle insures complete vessel coverage
- Spray pressure up to 350+ PSI and 20 GPM volumes assures thorough cleaning
- No brushes to wear out
- Explosion proof design standard
- Automatic and manual wash cycle offers complete flexibility
- Minimize water usage when used in conjunction with our separation tanks
