

MICRO SERIES

PURE RECOVERY

-  The Micro System allows you to control the quality of your reclaimed solvent
-  When you contract with an outside solvent reclaim service, your solvent might be mixed with other solvent and returned to you in a blend
-  A "blend" leads to questionable quality of your solvent
-  The Micro System allow you to reclaim your solvent

EFFICIENT

-  Micro Product Line offers distillation ranges of 100° to 550°F
-  A vacuum pump enables you to distill solvents with boiling points higher than 400°
-  A convection system enables evaporating the waste solvent quickly and uniform

ECONOMICAL

-  System allows for a reduction in disposal and new solvent costs
-  When you contract with an outside solvent reclaim service, your solvent might be mixed in an inexpensive way to convert hazardous waste into reusable solvent
-  Reduces labor costs with user-friendly controls and minimal operator attention

FEATURES
