

# RH LAB MILL

The RH Lab Mill is the latest in the line of grinding mills we at CB Mills have been producing since 1955, and is the pilot mill of the RH family of horizontal grinding mills. It is the most cost-effective method to perfect your batch recipe which can be scaled up to a larger mill to hit your target production capacity. All of the mills in our RH line can be configured with active cooling, pressurized grinding cylinders, and ANY grinding media. Contact us for a quote today!

*Multiple vessel and shaft configurations available.*

-  UL “Listed” electrical panel assembly available for hazardous or non-hazardous locations
